PROJECTS

Ai-Driven Fabric Visualization – (Team Project | Jan 2026 – Apr 2026)

- Developed "Homemakers", a full-stack web application using ReactJS, Node JS, Express JS, MongoDB, and RESTful APIs, featuring AI-powered fabric image generation through Google Gemini API.
- Utilized Git/GitHub for collaboration and deployed the application on Render, ensuring scalable architecture, responsive UI, and reliable performance.

E-Commerce Web Application (MERN Stack) – (Individual Project | Mar 2026)

- Built a full-stack e-commerce platform using MongoDB, Express.js, React.js, and Node.js with authentication, product management, and cart features.
- Developed RESTful APIs, integrated frontend-backend services, and deployed the application for scalable online shopping.

Medical AI Chatbot – (Individual Project | Sep 2025)

- Built an AI-based medical chatbot using Python, Flask, Lang Chain, Pinecone DB, and Gemini Flash-2.5.
- Designed the system to answer user medical queries accurately.

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern | Burg Rental Services LLP | Jan 2026 – Apr 2026

Developed features for an AI-driven fabric visualization platform using ReactJS, FastAPI, MongoDB, and REST APIs.
• Integrated Gemini API to enable AI-powered image generation and enhanced user experience.
